۱۹	<p>متن زیر را به دقت بخوانید سپس به سوالات داده شده پاسخ دهید.</p> <p><i>A dictionary is a book which explains the meanings of words and expressions. You can find words easily because dictionaries put them in alphabetical order. The word 'dictionary' comes from the Latin 'dictio' ('saying').</i></p> <p><i>There are several types of dictionaries. Dictionaries that explain words and how they are used; dictionaries which translate words from one language to another; dictionaries of biography which tell about famous people; and technical dictionaries which explain the meanings of technical words.</i></p> <p><i>Dictionaries which explain what words mean give a clear 'definition' of <b>them</b>. A good dictionary also gives more information about words. For instance, it explains how they are pronounced. Usually the International Phonetic Alphabet (IPA) is used for this purpose.</i></p> <p><i>There are also dictionaries which translate words into other languages. Very often one volume translates both ways; for example, half of the book is from English to Persian and the other half from Persian to English.</i></p> <p><i>When using a dictionary to find out how to say something in another language, one has to be careful to choose the right meaning. A word like 'right' has several meanings in English, for example, 'correct' and 'the opposite of left'. A word like 'present' may be used as an adjective, meaning 'not absent', as a noun, meaning 'gift' or as a verb, meaning 'give'. Words with different meanings exist in other languages, too. A good dictionary lists all the meanings of words to help people find the meaning that they look for.</i></p> <p><i>A complete dictionary also tells you about the <b>origin</b> of words and the story behind them. For example, the words like 'pajamas', 'bazaar' and 'paradise' entered English from Persian.</i></p> <p><b>True or False?</b></p> <p>64) A word starting with 'r' appears before a word starting with 'g' in a dictionary.
